

In order to run the model, follow these instructions

1. Use any IDE (VSC preferably), and open the app.py, and the three html files, present in the templates folder.
2. Ensure that all the files, such as the JSON file, and the ONNX file are present in the folder.
3. Run the app.py file in the terminal.
4. Click on the link, it will take you to the localhost.
5. Then, just go through the webpage, and choose whichever option you desire.
